

Invitation to workshop, June 4, 2018:

# MIXED METHODS in Social Sciences

## Welcome to a workshop with Moin Syed!

**Mixed methods research** is a general term that refers to the use of both qualitative and quantitative research methods. Although mixed methods research has become increasingly visible in the literature, many researchers and students continue to have questions about what mixed methods research is and how to conduct it.

The purpose of this workshop, that is for Ph.D.-students and researchers and will be held in English, is to provide an overview of mixed methods research in social sciences, to provide foundational knowledge and to address specific problems in applications of mixed methods research.

**Moin Syed**, Associate Professor of Psychology at the University of Minnesota, has led many workshops in mixed method and is a much-appreciated lecturer.

If you would like to participate send an e-mail to Caroline Järdmo before May 30:

Welcome!

*Arranged by: The research group GreY (Gothenburg Research Unit on Youth Development) at the Department of Psychology, University of Gothenburg, in cooperation with the Department of Social Work, University of Gothenburg, and Child and Youth Studies at University West.*

### Program June 4:

**10.00-12.00:** The first half of the session will consist of a seminar consisting of a review of the background and rationale of mixed methods research, its relevance for research, an overview of core concepts in mixed methods research, and a review of the major mixed methods designs with illustrative examples from the literature.

**13.30-16.00:** The second half of the session will be a workshop format, wherein participants present on a mixed methods research issue either something that they are currently working on or something they would like to do (10 minutes) and receive group feedback.

**Venue:** Room K6 at the Department of Psychology, Haraldsgatan 1
